SECTION 4 - PROJECT DESCRIPTION AND IMPACT AREA (Env-Wt 309.07(c))

Provide a description of the project, including a list of the work items to be performed and detailed dimensions of the size of the impacts in jurisdictional areas. Identify the type of landform to be affected, including the type of **wetland** and type of soils.

DESCRIPTION: Install seasonal dock and a seasonal boat lift adjacent to the dock. Both are made of aluminum. Both will be installed on our Lake Opechee waterfront property. (Our shoreline measures over 300') There was a dock here when we bought the property, but it appears it was never registered or transferred to us. I am requesting this permit be granted for a 40' dock as the water is very shallow on our side of the lake. The depth does not reach 36" (three feet) until you are 20 feet from shore.

Depth measurements (Measured on 4/2/2010) are as follows:

At six feet: 12 inches; At 12 feet: 22 inches; At 18 feet: 34 inches; At 20 feet: 36 inches;

The boat lift measures 9.5' x 9.5'

IMPACT AREAS: Fill out the table below, indicating square feet (SF) and/or linear feet (LF) of impacts, as applicable. Temporary impacts are impacts not intended to remain (and will be fully restored to pre-construction conditions) after the project is completed.

NOTE: For new seasonal dock projects, please enter the square footage of the proposed dock in the permanent impact column of the applicable resource.
