Topic: Request to designate Fairmont Street from Elm Street to Belvidere Street a no parking zone on both sides of the road

Discussion: This item was tabled from the August 12, 2019 meeting.

Fairmont Street between Elm Street and Belvidere Street is a narrow road. It is only 13 feet wide. Only three houses have driveways on that section of Fairmont Street (See attached map)

Due to issues with drivers parking their vehicles on the road in such a manner that they block other residents from getting out of their driveway, a Fairmont Street property owner has requested that both sides of Fairmont between Elm Street and Belvidere Street become a no parking area.

Public Works recommends that City Council approve this request.

Fiscal Impact: The estimated cost to install the necessary signs to implement this no parking area is \$400. The cost of the signs will come from the Public Works' regulatory sign budget.

Recommendation: Public Works recommends that the City Council approve this request.

Report Submitted by: Wesley B. Anderson, Director of Public Works after consultation with City Councilor Andrew Hosmer from Ward 6.

Proposed Motion:

"I move that the City Council approve to designate both sides of Fairmont Street between Elm Street and Belvidere Street a no parking area."
