After oil was discovered beneath their land, the Osage rode in chauffeured automobiles, built mansions, and sent their children to study in Europe. Then, one by one, the Osage began to be killed off. The family of an Osage woman, Mollie Burkhart, became a prime target. One of her relatives was shot. Another was poisoned. And it was just the beginning, as more and more Osage were dying under mysterious circumstances, and many of those who dared to investigate the killings were themselves murdered. As the death toll rose, the newly created FBI took up the case, and the young director, J. Edgar Hoover, turned to a former Texas Ranger named Tom White to try to unravel the mystery. White put together an undercover team, including a Native American agent who infiltrated the region, and together with the Osage began to expose one of the most chilling conspiracies in American history.

LIBBY VS. HOOPLA

Libby and Hoopla are two popular digital platforms that offer access to a vast array of digital content such as ebooks, audiobooks, comics, and more.

Libby, by OverDrive

OverDrive made an app for library users called Libby that is easy to use. It lets people check out ebooks and audiobooks via their local library to read or listen to on their phone or tablet. You can even send and read your borrowed ebooks to your Kindle e-reader! Digital material is easy to find, borrow, and read with Libby because it has an easy-to-use interface. Users can change the fonts and background colors; and sync across multiple devices to make their reading experience unique. The Libby collection is curated by NH librarians, which ensures popular, quality content is plentiful. It's free and easy to get started.

Hoopla

Hoopla, on the other hand, is a digital platform that has a wider range of digital formats, such as eBooks, audiobooks, music, movies, and TV shows. It works on a pay-per-use basis, so users can get material right away without having to wait. The large selection of content on Hoopla is always available, and users can play or download content to watch or listen to later. With its easy-to-use interface and wide range of media, Hoopla makes it easy to find digital material all in one place. Content is not curated by librarians so much of the collection consists of backlist titles. However, content is available to stream or download instantly to Laconia Public Library cardholders.
