# HUMMINGBIRD NECTAR RECIPE

Hummingbirds are fascinating little birds with their long beaks and fast-moving wings. They can be seen darting around nectar feeders and flowers across the United States! If you're interested in drawing hummingbirds to your yard, just follow this simple recipe.

## INGREDIENTS

- Refined White Sugar
- Water

## DIRECTIONS

- Mix 1 part sugar with 4 parts water (for example, 1 cup of sugar with 4 cups of water) until the sugar is dissolved
- Do **not** add red dye
- Fill your hummingbird feeders with the sugar water and place outside
- Extra sugar water can be stored in a refrigerator
- Change feeders every other day and thoroughly clean them each time to prevent harmful mold growth

## NOTES

- You can use tap water, and you don't need to boil it!
- Always use refined white sugar. Never use honey, corn syrup or raw, unprocessed sugars.
- Powdered sugar often contains additional ingredients, such as cornstarch. Therefore, it is not recommended for use in creating hummingbird food.
- For our region, set up your feeder from early May to late September.
