## Choosing the Right Toothbrush

### What Type of Toothbrush Should I Use?

With so many shapes, sizes and styles of toothbrushes on the market, deciding which kind to buy can be confusing. Here's what you should look for:

- Most dental professionals agree that a soft-bristled brush is best for removing plaque and debris from your teeth. Small-headed brushes are also preferable, since they can better reach all areas of the mouth, including hard-to-reach back teeth.
- When it comes to the type of handle (such as non-slip grip or flexible neck), shape of the head (tapered or rectangular) and style of bristles (such as rippled, flat or trimmed to a dome shape), pick whatever is most comfortable for you. The best toothbrush is one that fits your mouth and allows you to reach all teeth easily.
- For many, a powered toothbrush is a good alternative. It can do a better job of cleaning teeth, particularly for those who have difficulty brushing or who have limited manual dexterity.

### How Often Should I Replace My Toothbrush?

You should replace your toothbrush when it begins to show wear, or every three months, whichever comes first. It is also very important to change toothbrushes after you've had a cold, since the bristles can collect germs that can lead to reinfection.

A worn toothbrush (shown left, top) can damage gum tissue. Replace your toothbrush every three months or when it becomes worn.

## School Traffic Safety

### Vehicle Safety

Parents and other adults can do much to improve traffic safety around schools by driving cautiously, teaching children safe practices, and limiting vehicle trips. In some cases, parents and other drivers may be the cause of safety concerns. Drivers should obey all traffic laws and apply the following practices.

- Carpooling can reduce the number of vehicles near the school, especially during poor weather.
- Avoid parking on the opposite side of the street from the school. When it is necessary, instruct children on how to safely reach the vehicle.
- Make sure children are careful in opening the vehicle doors and that they exit and enter on the curbside of the vehicle.
- Drivers should not double park or block traffic. Waiting or parking in unauthorized zones is also not allowed.
- Do not block buses or use areas designated for buses only. If an emergency vehicle requires access, the area should be cleared.
- Never leave a running vehicle unattended.
- Do not park within a crosswalk or pass a stopped vehicle which is allowing pedestrians to cross.
- Do not violate the law by using the excuse "I will just be here a minute" when picking up or dropping off children. Violations still present a danger and cause congestion during the time of day when it is most important to provide safety for children and avoid congestion. Learn the traffic patterns at the school and avoid being a disruption.

### Pedestrian and Bicycle Safety

Pedestrian and bicyclists should obey the same traffic safety practices that normally apply. Children should be taught to be defensive. A child should not assume a driver sees them.

- Always look in all directions before entering a street, and never run into a street.
- Avoid crossing streets at mid-block, especially when parked vehicles may obstruct vision. Use stop signs, traffic signals, and crossing guards when available.
- When crossing a street, do not assume a green light or WALK light means it is safe to cross. Look for traffic.
- A child should not follow others or run to others when they call until a safe crossing is available.
- When riding a bicycle, ride with the flow of traffic (not against it) as close to the right edge of the street as practicable, in single file.
- Walk the route to school or other frequently used locations with your child and point out safe practices. This includes locations such as where children may catch a bus. Teach children about traffic laws, and encourage the child to ask questions when they are unsure of what to do.

*(Continued on next page.....)*

# Laconia Police Department

## School Traffic Safety

(Continued from previous page)

### Adult Crossing Guards

Adult crossing guards are provided near schools to assist children in safely crossing streets.

Guards are used primarily to provide maturity and good judgment in assisting children to cross streets near schools.

Guards are not provided to direct vehicle traffic movements. Adult crossing guards are professionals trained to focus their concern toward the welfare of the children.

Children should be taught to obey the directions given to them by adult crossing guards. This includes crossing only when directed, not running or riding bicycles at crossings, and being alert for traffic.

### School Bus Safety

Children riding school buses should also obey safe practices. The following should be observed:

- Wait for the bus in a safe place, as far from the edge of the roadway as practicable.
  - Enter and leave the bus in an orderly manner, using the handrail.
  - Remain seated, facing forward.
  - Follow the bus driver's instructions.
  - Keep hands, arms and feet inside the bus at all times.
  - Never run or throw items inside the bus.
  - Help keep the bus clean and in good condition. Report any unsafe or unsanitary conditions.
- Do not walk into the street near the bus without looking carefully for traffic. This is especially important when the bus may block the view of drivers.

From the City Clerk's Office

The City of Laconia would like thank all of the Elected Officials and poll workers for a fantastic job at the Primary Election on September 9th! It was a very long and tedious day for everyone and we could not have been successful without your hard work and dedication to this amazing civic duty. You truly are the glue that holds the elections in this City together.

As we move on to the November election, we would like to make sure the public is aware that there will be Municipal Charter Changes presented to the voters.

*Thank You!*
