

# ADULT CRAFT: FELT COLLAGE

## SUPPLIES

- Felt
- Hot Glue
- Tacky Glue
- Chipboard
- Pipe cleaners
- Pom-poms

## DIRECTIONS

1. Decide on a design that can be created with layering colors, some examples are a sunset, an ocean, a field, etc.
2. Choose several colors of felt (in most cases, you won't need a full sheet of each color)
3. Lay out your layers and cut to shape
4. Layer from front to back for overlapping
5. Glue the felt to each other and then to the paper
6. Embellish with pipe cleaners and pom-poms if desired
7. Trim the outside edges either as you go, or and when you're finished

## NOTES

- The glue will seep through if you use too much, but too thin won't stick enough
- Use the hot glue for the metallic pipe cleaners, and the tacky glue for the felt so that when it seeps through you don't burn your fingers
- You may want to also just use a dab of hot glue and then hold the pipe cleaner into the glue to save your fingers.
