

GLITTER HOUSE INSTRUCTIONS

1) Choose a house (limited amount of pre-assembled are available)
If not already put together, follow assembly instructions and hot glue together

2) If you wish to cover the windows, use a small cut out of the provided vellum paper with hot glue

Note: it might be easier to add windows to one of the not folded houses.

3) Paint the house

4) Paint a thick coat of glue over the paint and add extra fine glitter to make it sparkle. You can only paint on one layer of glue, so use an abundant amount of glitter.

Note about using glitter. Please conserve as much excess as possible. Pour glitter over tacky surface and let fall onto a piece of scrap paper. Reuse this glitter for more coverage if any glue still shows. When done, pour clean, un-glue covered glitter back into container.

5) Using glue to build up shape, add coarse white glitter along edges to make snow

6) Create a base with the provided chipboard, hot glue house to base.

7) Use the shaped scissors to create a fence from the thicker paper, and hot glue to base edges

8) Decorate with 1 tree and other provided supplies
