

Adult Craft: Wine Bottle Lantern

Supplies

- 1 wine bottle
- 1 lantern kit (includes: 1 stopper, 2 washers, 1 wick, 1 cover with chain)
- Small length of rope (long enough to circle wine bottle 4 times)
- Glue gun (to share)
- Rocks to fill 2-3 inches of wine bottle
- Lantern fuel

Directions

- 1) Wash wine bottle
- 2) Remove all labels using baking soda or goo-gone
- 3) Hot glue your length of rope around your bottle and secure the ends to the bottle
- 4) Fill the bottle 2-3 inches from the bottom with the aquarium rocks
- 5) Place the washer rings on the stopper and thread the wick, then insert into mouth of wine bottle (you will need to tilt the bottle to sift the rocks around so that the wick touches the bottom)
- 6) Trim wick so that cover fits on bottle (Note: it is not a tight seal)
- 7) Carefully pour lantern fuel into bottle leaving a little room at the top to prevent sloshing
