

Adult Craft: Needle Felted Bowl

Supplies:

- 1 needle
- 1 ball
- A small pinch of felted wool in your choice of colors, not more than 4
- Finger gloves for thumb and index finger

Directions:

- 1) With each color, pull apart a small section of wool and roll together gently.
- 2) Wrap the color around the ball form.
- 3) Stab the felt with the barbed needle so that the fibers stick together. Hold the ball in your thumb and forefinger, and watch where you're stabbing. It doesn't take a lot of force and you don't want other parts of your hand getting in the way.
- 4) Follow these steps for each color, layering over the last cover used and stabbing to adhere them together.
- 5) Once the wool reaches $\frac{3}{4}$ of the way up the ball, where it starts to curve in again, check that the wool is solidly stuck together. If secure, roll down to pull off from the bowl.
- 6) You may want to continue stabbing if there are any weak parts along your seams.
