

Rockin' Snails

MATERIALS

- Construction paper in multiple colors
- Markers
- Pencil
- Glue stick
- Round containers to trace circular shapes
- Scissors
- Elmer's glue (*optional*)
- Glitter (*optional*)

STEPS

1. Trace two circles (one big and one smaller) on two different colors of construction paper.
2. Cut out both circles, as well as two much smaller circles for eyes, and two small rectangles for tentacles.
3. Fold the biggest circle in half, with the rounded part on the bottom so it can rock.
4. Glue the slightly smaller circle on top of the semi-circle to make a shell.
5. Glue the tentacles and eyes onto the front of your snail.
6. Draw a spiral on the snail's shell (*optional*: add a spiral of glue, and sprinkle glitter on it).
7. Draw eyes and a mouth on your snail.
8. Tap your snail to let him or her rock!
