

FAIRY HOUSES

MATERIALS

- Flower pot
- Moss
- Sticks
- Fallen flowers
- Large leaves
- Popsicle sticks
- Glue
- Beads, fake gems, and other small shiny objects

STEPS

1. If you use a flower pot or jar as your fairy house base, either stand it up, or lay it on its side. (You can also build your fairy house against a tree).
2. Fill your flower pot with soil, grass, and other greenery. You could also plant live flowers of a houseplant in your pot.
3. Add flowers, large leaves, gems and fake beads to your fairy house. Fairies love bright, pretty things!
4. If you want to make a door for your fairy house, glue popsicle sticks together by lining up 5 or 6 next to each other, and gluing a popsicle stick across the top and bottom. You can then decorate your door with gems and moss to help it blend into nature.
5. Admire your beautiful fairy house and wait for magical visitors!

*Note: It's fun to make a fairy house outside! You can also use all-natural materials for this.
