CROWNS

MATERIALS

- Foam crown cutout
- Foam jewels
- Sparkly beads

STEPS

1. Prepare your crown by popping out the small pieces along the crown.
2. Pull the paper off the foam jewels, and stick them onto your crown wherever you would like.
3. For some extra bling, you can glue on sparkly beads! Hot glue works best, but you could also use white glue.
4. Pull the tape off the end of the crown, and stick one end to the other.
