
PENGUIN PAINTING

Supplies Needed

- White cardstock
- Black and white construction paper
- Extra pieces for decoration (pom poms, ribbons, etc.)
- Watercolor palette and paintbrush
- Scissors
- Glue stick
- Crayons or markers

Instructions

- Use watercolors to paint stripes on the white cardstock.
- While that dries, cut out penguin parts:
 - From the black construction paper, cut a U-shape for the body, an oval cut in half for the wings, and two small black circles for the eyes.
 - From the white construction paper, cut a smaller U-shape and two larger circles for the eyes. Then cut out an iceberg for the penguin to stand on.
- You will also need yellow feet and an orange beak.
- Glue all of the penguin parts together.
- When your painted paper is dry, glue the iceberg to the bottom of the paper. Then glue the penguin on top.
- If you want to add any decorations to your penguin, glue those on now. We added a hat, a ribbon and a pom-pom. You could also add mittens or a scarf to keep your penguin warm!
