

**DISCLAIMER:**

These lists of Species of Greatest Conservation Need (SGCN) per Town represent potential occurrences of species based on known or predicted broad distributions of species within New Hampshire and are for information purposes only. They do not necessarily represent known occurrences and in some cases a species may not occur in a town even though it is listed. As such, users should evaluate whether potential habitat is present within the area of question to further assess potential of such species occurring. These species lists shall not be used for permitting purposes. For a permitting datacheck of known occurrences and/or a landowner datacheck of protected species, see: <https://www.nh.gov/nhdfi/land-conservation/natural-heritage-bureau.htm>

**Not intended to be a substitute for required data check of NH Natural Heritage records for permit and grant applications.**

**RANGE TYPE**

Historic only

Statewide = species may occur statewide

Throughout = species may occur throughout its range

Localized = species may occur in specific habitats within its range

Town = species may occur in or was previously documented to occur in specified town

Marine = applies only to Atlantic and Shortnose Sturgeon

Migrant = non-breeding, applies only to Golden Eagle (no current breeding records)

**STATUS**

ST = state-threatened

SE = state-endangered

FT = federally-threatened

FE = federally-endangered

SC = special concern in NH

SGCN = Species of Greatest Conservation Need

(I) = introduced
