

# GOTH GLUE WATERCOLOR

## SUPPLIES

- Watercolor paint pallet
- Black glue
- Pencil
- Watercolor paper
- Brush

## INSTRUCTIONS

1. Draw an animal face or design lightly with your pencil.
2. Outline your design with the black glue.
3. Let dry until it won't smear.
4. Wet your paints with clean water and let sit to soften.
5. Wet the spaces in between your design with clean water.
6. Drop paint into your wet paper with your brush.
7. Or, brush on your paint into the wet spaces.
8. The more water you use the more it will blend the colors, but it will also run and take longer to dry if you use too much water. Experiment to find a happy balance.
